If You Want Roses Like These

DORMANT FIELD GROWN STOCK.

Did you ever see stronger looking roots or better looking bushes? These varieties differ somewhat in size of course, but this is a fair sample of the size of the Roses offered on the other side. We wish we had four times as many of them.

If it be quality you want and value in Roses, you can make no mistake here, but you will make a mistake if, realizing the extra value in such plants, you defer ordering. Because stock is limited and orders will be filled in strict rotation, so that—first come, best served and with Roses like the above to be sent you at planting time.

The Conard & Jones Co.
